PROFESSIONAL SUMMARY

Full Stack Developer and Tech Lead with solid experience in the architecture of web applications and SaaS products, backed by a previous track record in corporate management. Specialized in the JavaScript/TypeScript ecosystem (Node.js, NestJS, React, Next.js, Vue). I combine strategic business vision with advanced technical skills, staying at the forefront with the integration of Artificial Intelligence, automations, and comprehensive infrastructure management (DevOps) to scale products and optimize complex end-to-end processes.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, HTML5, CSS3, SQL.
- **Frontend:** React, Next.js, Vue.js, Tailwind CSS, Bootstrap, Sass.
- **Backend & APIs:** Node.js, NestJS, Express, Django, RESTful API design.
- **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, Sequelize.
- **AI & Automation:** Artificial Intelligence integration (dynamic query and report generation), workflow automation with n8n.
- **Infrastructure & DevOps:** Server provisioning and configuration, domain and DNS record management, production deployment of Frontend/Backend architectures, transactional email configuration (Resend), legacy system integrations.
- **Architecture:** Monorepo (NestJS), Git (GitHub, Bitbucket), Jest, AWS, Cloudflare, Railway, Supabase.

PROFESSIONAL EXPERIENCE

Adavra | Co-Founder & Tech Lead
January 2026 – Present

- Lead the architectural design and end-to-end development of Enfines, a B2B SaaS product aimed at managing educational organizations. (enfines.com.ar)
- Architected and developed the backend of a corporate backoffice to manage and oversee multiple applications.
- Implemented a monorepo architecture in NestJS, creating reusable modules and libraries (libs) across different projects.
- Manage the complete infrastructure of the products, from server provisioning for the backend to domain configuration, DNS routing, and continuous deployment.
- Engineered a highly user-configurable dashboard module, integrating Artificial Intelligence to define database queries and automatically generate dynamic reports.

Freelance Full Stack Developer | Independent Professional
April 2023 – Present

- Deliver end-to-end software solutions, covering everything from code to production infrastructure configuration, handing over server ownership to the final client after deployment.
- Frontend Development and Web Architecture: Built the website for the photography brand Vanguardia by Negrovski using Next.js.
- Managed all underlying infrastructure: custom domain configuration, DNS, and structuring transactional emails through Resend (bypassing traditional email hosting). (vanguardiaboudoir.com.ar)
- Spearheaded the creation of an interconnected ecosystem for a catering company (Vue.js, Node.js, PostgreSQL), developing logistics and menu management systems.
- Achieved a successful integration by synchronizing data from a legacy accounting system.
- Developed a comprehensive web application for real estate administration and operational rental management.
- Built "FinEs Mapa Interactivo," a government data visualization tool with geolocation using Django, Python, and PostgreSQL.
- Structure projects technically and commercially for government entities, ranging from technical architecture to the legal formation of companies (SAS) for billing.

Devtion IT | Full Stack Web Developer
March 2021 – April 2023

- Participated in the frontend and backend development of web and mobile applications for corporate clients (Ellie Care, RedLink, Campar).
- Implemented technological solutions using the MERN stack (MongoDB, Express, React, Node.js).
- Managed integration with relational databases (PostgreSQL, MySQL) according to the architectural requirements of each client.

Founder and Socio-Labor Tutor | Grupo Ilimitadamente (Adult Secondary School)
March 2019 – Present

- Co-founded a group dedicated to education and economic development in vulnerable areas on the outskirts of La Plata, managing resources and coordinating teaching teams.

Previous Experience in Corporate Management and Business Administration
2006 – 2018

- Corporate Director, Grupo ZT Hotels (Spain): Directed operations, central services, and management teams of 7 hotels and a catering service, reporting to the CEO. My main functions were to design and supervise the company's processes and optimize the group's profitability.
- Operations Manager and F&B Director: Led multidisciplinary teams and comprehensive management in 4-star hotels, honing skills in leadership, strategic decision-making, and problem-solving.

EDUCATION

- Associate Degree in Programming | UTN (Universidad Tecnológica Nacional) | 2025 – Present
- Information Systems Engineering | UTN (Universidad Tecnológica Nacional) | 2024
- Bachelor's Degree in Hotel and Gastronomic Business Administration | UNSAM | 1998 – 2001

LANGUAGES

- Spanish: native
- English: B2 Level
- Italian: B2 Level
